The pictures or words may be inconsistent due to upgrade of product edition or specification modification and are subject to actual products without further notice.
1. Appearance Description
2. Getting Started

2.1 Battery Recharge

MiTraveler has one built-in battery, which should be fully charged (for at least 8 hours) before the initial use.

Power Adaptor

Connect the power adaptor to the power source and the other to the equipment jacket to recharge.

Recharging

1. Plug the power adaptor and the recharging indicator will be Red, which means it’s recharging. When the battery is full, the indicator will be Off. Unplug the power adaptor, the indicator will stay Off.

2. During recharging, you could still use the equipment.

Notice:

The recharging time will be longer if the equipment is in operation.

2.2 Memory Card

Insert the Memory Card:

- Insert the memory card into the slot and press until a click is heard.
- The upper left of the screen will indicate: Preparing memory device.

Browsing the Memory Card:

- Run the My pad application to show all files under the root directory
- Select SD 1 (TF card 1, Micro SD card) to browse the contents in the card.

Unplug the Memory Card:
- Close all files in the card,
- Touch the menu icon and select Setting → SD card & device storage → SD 1 → Unmount SD1.
- The system will show “Memory device safe to remove”.
- Press the card and the card will pop out.
- Take it out and the upper left screen will show "Removed memory device”.

Notice:
1. The card insertion has to be proper or the card will be damaged;
2. Don’t forcibly unplug the memory card without the message “Memory device safe to remove”, or it might damage the card;
3. If the card is write-protected, it wouldn't be formatted or written before canceling write-protection.
4. Mainstream memory cards are advised to avoid compatibility.

2.3 Hot Plug of Memory Card and External Flash Disk

Don't hot plug when you are using or browsing the files in the memory card or in the external flash disk.
For example, you’re browsing My Video, My Video or My Photo Album or using files in the memory card or in the external flash disk, directly unplugging the memory card or external flash disk may damage the card and the flash disk and the equipment may terminal the application for self protection.

**For hot plug of the memory card, please refer to 2.2 Memory Card. Close all files in the flash card before unplugging the external flash disk.**

2.4 Storage Space

There are 3 storage space areas: Device internal memory, External memory card and External flash disk.

Equipment Internal Memory,
- Equipment Internal Memory will not be shown;

External Memory Card
- The folder names of SD (TF card, Micro SD card)are SD 1 and SD 2;

External Flash Disk
- The folder names of the U Disk are U Disk 1 and U Disk 2.

After flash disk or Memory Card connected, you can copy files between the flash disk, the equipment and the memory card.

**For copy method, please refer to 7.3 Document Browser**

The system storage area is only for system file storage; the entire equipment internal space is
2GB and the flash disk and memory card are subject to the specific capacity supporting 32GB maximum.

**For detailed information, please refer to 9.6 TF Card (TF card 1, Micro SD card) and Equipment Memory**

2.5 Power on/off

1. **Power on:**

   Press the **Power Button** on top for 2 seconds. The equipment will be vibrating for once during power on and it enters screen lock interface.

   Slide the **Unlock icon** upward hit to enter the main interface; slide the **Sound icon** for sound OFF.

2. **Power off:**
3. Sleep mode:

Press the power icon (1 second) and the system will enter sleep mode - the LCD screen will fade. Press the power icon to wake the system during dormancy and it enters screen lock interface.

**If the battery is low during sleep mode, the device will power on the system and then power off right away to save power.**

2.6 Vibration mode

Enable Vibration mode: touch Settings icon on the shortcut bar, choose Sound and check the box on the right of Haptic Feedback to enable vibration.

Disable Vibration: when the vibration is on, touch Setting icon on the shortcut bar, choose Sound and uncheck the box on the right of Haptic Feedback to disable vibration.

2.7 Screen Rotation
The screen will automatically rotate in responding to the direction of the device. If you hold it vertically, the screen will be vertical and if you hold it horizontally, the screen will be horizontal. The screen rotation will be done in 2 seconds and be refreshed back to normal after rotating back.

2.8 Network Connection

External Cable Network:

Insert the Ethernet network cable into the Ethernet port of the tablet and Ethernet icon will be shown on the top status bar on the screen. The equipment will connect the network by automatically acquiring an IP address. You also can acquire a static IP address through manual setting. After the IP address is set, you can surf the internet.

**Please Refer 8.2 Shortcut Configuration for manual IP setting **.

Wireless Network:
1. Switch to ‘ON’ the Wi-Fi switch on top of the device to enabled Wi-Fi function;
2. Tap the Settings icon on the shortcut bar;
3. Tap the Wireless & Networks on the setting menu;
4. Check box next to Wi-Fi to turn on Wi-Fi function; **To save power, Wi-Fi will be off if Wi-Fi box is not checked even Wi-Fi function was enable**
5. Tap Wi-Fi Settings to scan Wi-Fi network;
6. All available wireless network near the unit will be listed after scan. Tap the network name that you want to connect.
7. If the wireless network was connected successfully once before, network information was stored. Choose “Connect” on the popup menu to connect network or choosing “Forget” to erase network information.
8. Connect non-Secured network, choose “Connect” on the popup menu to connect ;
9. Connect Secured network, input the network keys or password on the popup menu then choose “Connect” to connect;
10. After the network is connected, a Wireless connection icon will be shown on the top status bar.

3. Input Operation

3.1 Keyboard

Software Keyboard
The unit has a software keyboard which automatically show up when you tap the place on screen where text or number are to be entered.
USB Keyboard

The unit supports external USB keyboard to input text and numbers. Some buttons on the unit and some function keys on the keyboard may not work if an external USB keyboard was connected.

3.2 Touch Screen

The touch screen responds to finger touch as well as the stylus (touch pen) included with the device.

**Notice: don’t place any object on the touch screen for it may damage or crush the screen.

Single Click: single click one icon to choose the icon or option you want.
Long Press: press and hold one icon to choose the icon and you can drag it to the bottom shortcut bar.
Drag: drag on the screen and you can move between magic cube sides or drag the application icons into the shortcut bar.

3.3 USB Mouse

The device supports external USB mouse. Connect an USB mouse and you can single click, choose, drag, slide and right click.

4. Getting to Know the Desktop

4.1 Status Bar

The status bar on top of the screen has one icon on the left side (Home) and five icons on the right (Camera, Volume Button, Menu Button and Return Button). On the status bar, there are system information including 3G signal status, Wi-Fi signal status, Ethernet status, battery status and time.

- Wireless Network Status Icon: will show if wireless network was connected
- Battery Status Icon: Show battery status
- Time Display: Display time status
Update: Start Media scanner

Camera Icon: camera

Volume Icon: Adjust unit volume

Volume Icon: Adjust unit volume

Menu

Return

3G Icon: will show if 3G network service was using to connect network

Cable Network Icon: will show if Ethernet cable was using to connect network

4.2 Main Interface

The main interface application page of the tablet palmtop has two main Views:
1. Widget mode
2. Application icon mode.

You can switch modes by tapping the central icon on the tools bar. By touching the icon, The Widget Mode will shown as follows:
Touch the icon the Application Icon Mode will shown as follows:

4.3 Shortcuts

On the widget mode, tap the Menu icon on the top, a shortcut menu will pop up at the bottom of the screen. The shortcut menu includes: Add Widget, Wallpaper, Notifications, Settings. See the picture below:
4.4 Window Widget
If you want to add the shortcut into the main screen, Tap **Menu** on the Widget Mode interface, then tap **Add Widget-Shortcut**. Choose a shortcut and add it into the main screen. Click the shortcut icon on the main screen and it will execute the corresponding operation.

4.5 Desktop Gadget
You can add, delete or install desktop widget, add or delete application icons, move or change icon positions, drag between the shortcut bar and the operation area and add or delete icons in the operation area.

On the desktop widget mode interface, long press the gadget icon and a check will pop up on the screen and a trash bin icon will pop up in the center of the shortcut bar. You can drag the icon to any place on the screen or into the trash bin to delete.

8. Hints and Tips

8.1 Convenient Operation Manners

To return to the front page-------click
To adjust the volume------click

**8.2 Shortcut Configuration**

Connect to Wireless Network

Click Wi-Fi icon to enter the wireless network interface shown as follows:

![Wi-Fi settings](image)

Connect to Cable Network:

Click cable network icon to enter cable network interface and manually set your IP shown as follows:
Connect to 3G Network:
First, you need to buy a 3G wireless card from your 3G service provider. The equipment at present supports: Huawei

- **EVDO:**
  - EC122
  - EC169C
- **WCDMA:**
  - E1750
  - E1752
  - K3765

Since our company is continuously committed to improving product quality and the software edition is always updating which will support more models in the future, please refer to the finished products.

You have to buy above mentioned model to get access to 3G network. Insert your SIM card into the 3G card and then insert the 3G card into the USB port. The signal light of the 3G card will be light which means you’re ready for 3G network surfing.

Click Settings -> Wireless & Networks -> Mobile networks to enter:

Select the checkbox on the back of 3G network and you’ll see ![3G icon](image) which means 3G connection is completed.

### 8.3 Saving Power

The device has a wide screen and needs a lot of power. In order to conserve power, consider the following:

1. Watch movies, listen to the music or take photos consumes more power than other operations;
2. Reduce display brightness: press settings → display → brightness (reduce the brightness);

** Warning: Factory data reset setting will delete your Google account, data and configuration of system and applications and applications from downloading.**

**Please use this function carefully.**
Michley/Tivax Limited Warranty to Original Purchaser

Michley/Tivax warrants this product purchased in the USA against defects in material and workmanship under normal use and service for a period of one year from the date of retail purchase by the original end-user purchaser. Products will not be warranted if the serial number is removed or defaced.

This warranty shall be void upon transfer of ownership of this product and is effective only when used in the United States.

Michley/Tivax agrees to repair or replace this unit at no charge, within the warranty period, providing that the product is delivered to Michley/Tivax in its original package or equivalent, fully insured, with all shipping charges prepaid and a return authorization number listed on the outside of the packaging. A handling charge of $25 will be applied to any returned product found not to be defective. To honor this warranty and to ensure the best service to our customer, Michley/Tivax requires the following information to be included with the returned unit:

- A copy of the original sales invoice from your vendor.
- Model number & serial number of the unit.
- A detailed description of the problem associated electrical connection and hardware.

A Return Authorization number can be requested by sending a fax to 650-963-3585 or an email to support@tivax.com prior to returning the unit.

This warranty contemplates the owner will reasonably maintain this product without alteration, negligent use, misuse, or abuse. Furthermore, any unauthorized alteration of this device without written approval by Michley/Tivax will void any warranty and the owner's right to operate this device.

This warranty presented above is exclusive and in lieu of all other expressed or implied warranties. Any warranty applicable to this product is limited to the period described above. In no event will Michley/Tivax be liable for any special, incidental, or consequential damage, loss of revenue, or cost of replacement goods resulting from the use of malfunction of this product to the equipment system on which it is used. This warranty gives specific legal rights and you may have other rights that vary from state to state.
